

Flexe-CG

Polymer Based Cementitious Grout

FLEXE CG is a polymer based cementitious grout. Carefully selected blended of Portland cement, specially chosen chemical additives, and rich color fillers. Designed for use with WATER and **FLEXE GROUT ADMIX** to create wonderful art in tile joints.

Features / Advantages

- Interior and Exterior applications
- Tight joints improve life of the grout
- Excellent Crack bearing ability and powdering
- Carefully Selected Proven Portland cement in pack
- Non-shrinking
- Easy application
- Easy cleaning
- Available in range of colours
- Self-curing when using Grout Admix
- Weather resistant
- Designed for 1mm to 5mm joint width

Mixing

Use **FLEXE GROUT ADMIX** / Water 370 ml to 400ml per 1 kg **FLEXE CG**. Gradually add **FLEXE CG** in to water / **FLEXE GROUT ADMIX** for optimum result.

COVERAGE

Approximate coverage per 1 kg of unsanded grout

Tile Size (in mm)	Joint Width		
	1mm	2mm	3mm
300x300x3	300	155	105
300x300x6	156	178	54
300x300x8	120	60	40
600x600x3	600	315	210
600x600x6	315	160	105
600x600x8	235	120	80
600x600x10	190	104	63
900x600x3	750	375	250
900x600x6	374	187	125
900x600x8	280	140	94

Packaging:

1 kg Packet (1 kg x 10) – Carton & 10 kg Bag
